

Use of the TÜV Rheinland test mark

On the basis of the inspection and certification services, and in compliance with the list of TÜV Rheinland test marks, TÜV Rheinland Industrie Service GmbH awards the client the TÜV Rheinland test mark together with a company-specific or regulation-specific ID number, entry of this mark in the Internet database Certipedia (www.certipedia.de) and the corresponding possibility to link to the client's homepage.

The test mark of the Certification Body is attached:
Certification Body Construction Products
Head: Achim Makowka (Achim.Makowka@de.tuv.com)
Am Grauen Stein, D-Köln

The client is entitled to use the TÜV Rheinland test mark for advertising purposes provided that the following points are observed:

- Use of the mark is only permitted during the period of validity of the certificate issued. Permission to use the mark expires when the contractual relationship ends, or when the period of validity ends. In this case the client has to ensure that the mark is no longer distributed or is in circulation.
- The mark may not be associated with any statement that bears no connection to the inspection or certification. Generalised advertising statements that bear no reference to the scope of the inspection services ("We are supervised and inspected by TÜV Rheinland ") are not permitted.
- The design of the mark (composition, shape, colour, typography) may not be changed or modified. It is not permitted to remove any part of the test mark.
- The TÜV Rheinland test mark may not be associated or combined with any other logos, marks or symbols. When the mark is placed beside other marks or symbols, then sufficient distance should be

maintained between the two.

In particular the symbol may not be placed together with the CE-mark on the construction product or on the declaration of performance. Any confusion or misleading information must be avoided. The test mark only serves to identify the certified area "Factory Production Control" of the client.

- Before the mark is used in brochures, advertisements and in other printed matter the client shall submit the layout to TÜV Rheinland Industrie Service GmbH for approval before such material is released for printing.
- The client accepts the general terms of copyright published on the Certipedia homepage (www.certipedia.de).
- TÜV Rheinland Industrie Service GmbH reserve the right to revoke the entitlement of the client to use the test mark at any time.
